

Smart Card Printing from a Proven Technology Leader

Safe, secure, and easy to use are three attributes that make our smart card printers best in class.

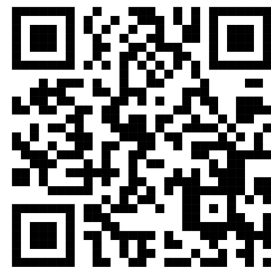

Whether printing highly sensitive data that requires multi layer protection, or simply printing basic ID badges, we have the printers and software technology to open your organization to new worlds of productivity and security.

Introduction

Why DASCUM

For nearly 35 years DASCUM has been a technology leader in a variety of global markets with an emphasis on document solutions and print technology.

Today DASCUM offers a full range of complete and unique smart card printing solutions including direct-to-card, retransfer, and lamination options for a wide variety of applications.

We are a global company with a personalized touch, offering unique and customized solutions.

From cost-effective direct-to-card models all the way up to our incredibly fast DC-7600 retransfer printer, DASCUM sets a standard for id badging, access control, prox solutions, and many other features and applications that make us "just better" when it comes to smart card printing.
