PatchIM
## Revolutionary Card Printing Innovation

DC-7600 Retransfer Printer

PatchIM is a revolutionary innovation that allows you to apply a crisp, clear, over-the-edge print and laminate onto a card using the DASCOM DC-7600 Retransfer printer WITHOUT the need for a laminator

Advantages of PatchIM include:

- Eliminates the need for a separate laminator, providing upfront cost savings

- Eliminates the need for separate laminate consumables, providing ongoing cost savings

- Greatly improves useful card life expectancy - PatchIM cards are estimated at 5-7 years of useful life versus 1-2 years for traditionally printed cards

- Use optional Holo PatchIM to produce a more secure credential.
